I cannot believe that you folks entered into this limp dick settlement against M\$. Gates is the ultimate capitalist pig, trashing competition and foisting trash OS's on folks. M\$ continues to violate the spirit of competition as we speak. As an example their file backup system in ME & XP backs up Interbase database files (an open source competitor) every time there is a change. This has the effect of slowing a system using IB to the point it is useless and appears inferior to M\$ products. This was done purposely to make IB look bad.

But you go ahead with your settlement. You have really acted in the interest of the citizenry.

Or is it that Bill Gates contributed big time the the republicans.

Shame on you and the government. You failed. I will not comply.
